## \* New product range \*

*At Tuatahi we've been working on a new product range and are really excited to be able to introduce these.*

### **Tuatahi Training Axe:**

*We have developed an axe with a special rolled chisel edge. This axe is capable of cutting knots and frozen wood. It is very free in the wood and ideal for training purposes. Size = 7 1/4" long x 7" wide (can supply larger if required).*

### **Tuatahi Peg and Raker Training Saw:**

*This saw has been specifically designed so that you can keep your competition saw fresh for the season, and have a saw available specifically for training.*

*The saw is a 2 Peg design and comes in various lengths and widths to suit (current lengths are 5'7" and 6' long). These saws can be used in hard or soft wood, just advise the wood type when ordering.*

*They are less than half the price of a new Peg and Raker Racing Saw, and you will get many years use out of them.*

### **Tuatahi M Tooth Work Saws:**

*We have also extended our work saw range. We now have a 6' long M Tooth Work Saw that can also be used as a training saw. These can also be set up for hard or soft wood, just advise the wood type when ordering.*

### **Tuatahi Peg and Raker Work Saws:**

*We now make Peg and Raker Tooth Work Saws. These come in a variety of lengths (currently 4'3" long, 5'7" long and 6' long) We have had great success with these particularly in the USA where they are used for trail clearing. These can be set up for a wide variety of wood types.*

*Talk to us about the new product range today!*

## **\* New Polo Shirts \***

*We have a new range of Polo Shirts.*

*These shirts are from the new “Quick Dry” range—as you exercise, quick dry rapidly absorbs moisture, then disperses it leaving the fabric dry for continued comfort.*

*They are very lightweight and can either be worn as a dress shirt, or while competing.*

*Available in a wide range of sizes and navy blue in colour.*

**\*\* FREE POLO SHIRT WITH ALL ORDERS OF  
5 OR MORE AXES \*\***

## **\* Saw Machine helps production \***

*Our Saw Grinding machine is up and running and has made a huge difference to production.*

*We are currently making all of our Work Saws, M Tooth Racing Saws and Training Peg and Raker Saws on this machine.*

*We have employed a new staff member (Dylan) to operate the machine and as a result we are also starting to catch up on repair work.*

## **\* Finished axes in stock \***

*For many years we've been trying to build up our axe stocks and have them available all finished and ready to go, without customers having to wait while we make them.*

*We currently have in stock:  
Australian Hardwood Racing Axes  
Europe Poplar Racing Axes  
Work Axes and Training Axes etc.*

*Stocks are changing all the time,  
just let us know your  
details and we'll see if we can  
supply straight away!!*

## **\* Eurojack Success \***

*In April our axe forger and saw maker Grant Fawcett, traveled to Austria to attend the Eurojack Series and hold an Axe and Saw Sharpening Workshop.*

*It was a great experience to be able to meet with some of our Europe customers, see first hand the wood you are cutting and teach about axe and saw maintenance. And also the correct technique to get the best performance from our equipment.*

*Thank you to all those involved, especially Kurt Graf and his family. We hope to travel to Europe again in 2011 so if you are interested in further training camps, just let us know and we will be in contact.*

*In the meantime, we look forward to supplying new equipment to you soon!*
